### FOR IMMEDIATE RELEASE

## QuoteWerks Releases New Import Utility for Dell Quotes

*New utility aims to increase efficiency in quoting for Dell resellers.*

ORLANDO, FL (PRWEB) July 24, 2008 — Aspire Technologies, Inc., a leading provider of sales quoting software solutions for the global small and midmarkets, released today a new utility for QuoteWerks that imports HTML quotes received from Dell.

This new utility, developed by the QuoteWerks development team, reduces the time it takes technology firms to produce quotes for their clients that contain Dell products. Once a QuoteWerks user receives a quote from their Dell representative via email (as an HTML attachment) the user can begin importing the quote into QuoteWerks. The applet will allow the user to set the import parameters such as how QuoteWerks will handle the Dell Quote number, individual product part numbers, and the category descriptions for each item included on the quote. The utility can also import both grouped items and individual items into the quote.

The screenshot shows a window titled "QuoteWerks Applet: Import Dell Quote". The window has a blue header bar with the text "QuoteWerks Applet" and "Import HTML Dell Quote". Below the header, there is a text area with the instruction "This applet will import an HTML formatted Dell Quote into QuoteWerks." followed by a field labeled "Dell HTML Quote:" containing the file path "f:\support\dellquotes\quote\_439329526.html". Underneath, there is an "Options:" section with several checkboxes and dropdown menus. The "Set Vendor as" field is set to "Dell". The "Place Dell Quote Number in QuoteWerks Field" checkbox is checked, with a dropdown menu set to "CustomText01". The "Part Numbers" section has three checkboxes: "Remove Dell Part Number from Description" (unchecked), "Place Dell Part Number in Vendor Part Number Field in QuoteWerks" (checked), and "Place Dell Part Number in Manufacturer Part Number Field in QuoteWerks" (unchecked). The "Category Descriptions" section has two checkboxes: "Insert Category Description at the start of Description" (unchecked) and "Place Category Description in QuoteWerks Field" (checked), with a dropdown menu set to "Item Type". At the bottom, there is a "Close After Import" checkbox which is checked, and an "Import" button.

automatically passed to the user's CRM system, users are able to schedule follow up calls and relate sales tasks to the quote. Also, users can easily include Dell items into a QuoteWerks layout and format of their choice. Finally, all items (and related data) imported via the utility is now stored in QuoteWerks making it fully accessible and searchable for reporting and tracking purposes.

Additional utilities that are available at no cost to QuoteWerks users are:

- **Excel Utility:** Convert QuoteWerks fields (both document header and document item) into a pre-formatted XLS file.
- **Multiple Product Source Search:** Enables users to search for products across multiple product sources.
- **Rounding Utility:** Round line items on the current document (quote, order, or invoice) to the nearest decimal place or multiple.
- **Group Part Number Builder:** Creates a Manufacturer Part Number for Group Header lines created by Bundles, Configurations, or on-the-fly based on a custom field in each member of the group.
- **Tech Data Shopping Cart Importer:** Imports the items in the Tech Data shopping cart into the currently open quote.

The Dell utility, along with the other QuoteWerks utilities, is available for immediate download from the QuoteWerks website. All utilities are offered free of charge.
